Russian — Native

English — A2–B1

EDUCATION

SPbSUE

Information Systems and
Technology

2021 – 2025

PROFILE

Frontend developer with 4+ years of experience building fast, scalable, and user-friendly web applications. Core stack: React and Vue.js, with backend experience in NestJS. Passionate about clean code, thoughtful UI/UX, and bringing AI tooling into real development workflows — including modern AI-collaboration methodologies (context engineering, harness engineering, loop engineering), where AI agents are launched, self-verify, and iterate autonomously.

EXPERIENCE

Middle Frontend Developer @ GameSport

November 2024 – Present

Saint Petersburg · Hybrid

Vue.js

React

TypeScript

Pinia

Vuex

NestJS

Playwright

Vitest

PWA

- Led frontend development across 3+ projects — architecture, code quality, team processes
- Built Telegram Mini Apps and PWAs for 2 projects, improving user retention
- Developed admin panels handling large datasets with complex chart visualizations
- Led a full application redesign — independently created the UI mockup and implemented it end-to-end
- Introduced E2E tests (Playwright) and unit tests (Vitest) across the codebase
- Conducted technical audits of 3+ projects with written recommendations
- Set up documentation, reducing onboarding time for new developers
- Mentored junior developers, improved the team's delivery process

Junior Frontend Developer @ FiveMods

March 2023 – November 2024

Saint Petersburg · Remote

Electron

Vue.js

TypeScript

NestJS

Playwright

REST API

- Designed and built a full-scale Electron desktop application — delivered on time with no critical bugs at release
- Independently developed the frontend for an Electron-based launcher
- Wrote E2E tests (Playwright) covering all critical user flows
- Built a landing page that improved user conversion
- Built a full support-manager dashboard integrated with a NestJS backend

Frontend Developer Intern @ BIOCAD

April 2022 – October 2022

Saint Petersburg · Hybrid

Angular

TypeScript

REST API

- Developed a real-time interface for controlling and monitoring CNC machines, used daily by operators
- Optimized user workflows — improved team efficiency by 10–15%
- Delivered production-ready features during a 6-month internship in a corporate environment

KEY ACHIEVEMENTS

- Improved SEO performance by 80–90% through technical audits and on-page optimization
- Implemented AI-driven processes using the Claude API — built MCP agents and knowledge bases with Cursor
- Implemented smooth animations and skeleton loading states, significantly improving perceived UX
- Mastered next-gen AI-collaboration methodologies (context/harness/loop engineering) for autonomous AI agent launch and iteration
